

CONTINUUM

Evidence to Outcome Career Operating Layer for Talentbank Career OS

By Mohd Hafiz Ali Bin Mohd Anuar

ACKNOWLEDGEMENT

With sincere gratitude, I would like to thank Talentbank for creating a meaningful opportunity to participate in this competition, learn from the graduate employability ecosystem and challenge myself to develop a more ambitious and impactful proposal. Special appreciation goes to Mr Ben Ho, Founder and Chief Executive Officer of Talentbank, and to the entire Talentbank team for the opportunity, inspiration and confidence they have extended.

I also wish to express my sincere appreciation to Universiti Sains Malaysia, particularly Professor Dr Wan Ahmad Jaafar Wan Yahaya, Deputy Vice Chancellor for Student Development and Alumni Affairs, Professor Ir Dr Mariatti Jaafar @ Mustapha, Director of the Engineering Campus Tuanku Syed Sirajuddin, and Professor Dr Azizah Omar, Director of the Student Development Centre, Student Development and Alumni Affairs Division. Their support, encouragement and motivation strengthened my confidence to refine this idea into a system that is clearer, more responsible and capable of adding value to the career ecosystem.

My deepest appreciation goes to my mentor, Coach LENAgaz. Through three online discussion sessions and continued guidance through WhatsApp, she challenged assumptions, opened broader ways of thinking and helped sharpen the direction of this product. The evolution from Lumina to Continuum, including many of the decisions that shaped the final product, was meaningfully initiated and refined through those discussions.

Finally, I extend my heartfelt thanks to my family, colleagues and friends. Their prayers, patience, support and belief gave me the strength to complete this work within the required time.
